MEMORANDUM FOR THE RECORD

SUBJECT: Visit to [] Color Measurement Laboratory and discussion
with [] director

1. [] TSSG/RED/ATB, visited the Color Measurement Laboratory of the [] on 4 February 1970. This laboratory and its director, [] are being considered as contractors for the ATB in the area of color measurement. [] is uncleared and was witting of my employment with the Agency.

2. I presented [] with a list of typical color measurement problems that NPIC and the ATB might run into, in establishing both a precision color measurement facility and the "color cell" for P.I. use. These problems were generated as a result of discussion with various personnel who will be concerned with color measurement activities. [] indicated he thought that he could provide some answers in most of the areas, or if he could not, he could obtain answers from others who are involved with similar problems. He indicated contacts with color measurement facilities at []

3. The [] Color Measurement Laboratory has two spectrophotometers, a colorimeter, an HDL Comic (Analog color dye mixer), a color difference meter and various color presentation devices. It also contains sources of illumination for visual color comparisons under different color temperatures.

4. The staff of the laboratory consists only of [] and those graduate students in the color program. It appears that we would contract with [] not the laboratory.

5. In reference to the above he indicated his consultation rate was [] a day plus travel. I mentioned the problem of the personal services contract and he indicated that something else might be worked

out if this route was not available. I indicated the probable need for security clearances, and he indicated no reluctance. He definitely seemed interested and looked forward to an association with the Agency.

6. I have available a biographical sketch of [] a description of his laboratory, a list of papers and books he has written and selected reprints of some of his articles. These are available to interested parties. 25X1

7. On the basis of my discussions with [] and knowledge of some of the work he has done, both for the color measurement laboratory and for other organizations, I would strongly recommend that he be considered as a consultant to the Advanced Technology Branch/RED. 25X1
